Decentralization reform

Background

The Ministry of Internal Affairs is the lead agency of the Government of Liberia's Decentralization Program. The program seeks, among other things, to rationalize and strengthen local governments in Liberia so that they can be more effective and efficient in service delivery and local economic development.

Rightsizing the local government workforce is part of the decentralization reforms. This will reduce training costs, increase productivity and lower the cost for Operating local governments. A key initiative in attaining the right size and mix of local government staff is the comprehensive and timely retirement of those who qualify for the Government of Liberia's retirement program, as provided for in the Civil Service Regulations.

Because the MIA has offices throughout Liberia and intends to carry out its reforms in a professional and conflict-sensitive manner, it has determined that some elements of the retirement project should be outsourced.
